

METEOROLOGICAL THERMOMETERS

TECHNICAL DATA, PRODUCT VARIANTS AND ACCESSORIES

The following table lists the various characteristics of meteorological thermometers, including the measuring range, accuracy, variants, and the corresponding data.

FEATURE	VARIANTS
Measuring range	-40 °C to +100 °C
Filling	Organic (red/blue) Metallic
Forms	Enclosed scale
Norms	DIN, British Standard
Filling	ACCU-SAFE (blue)
Norms	ASTM DHI Clas II
Variants	Maximum thermometers Minimum thermometers Psychrometer thermometers Soil thermometers Globe thermometers Kata thermometers
Accessories	Spare moisture wick Spare globe for globe thermometer Support for soil thermometers, zinc-coated steel Spare protection case for soil thermometers Spare graphical evaluation chart 500 mm und 1000 mm Ersatz-Psychrometer-Auswertetafel
